

Odor Control System6 for Buildings with 31-40 Floors

This system is ideal for buildings with an enclosed trash collection room and trash or garbage chute of up to 40 floors. It consists of two Control Units with four remote 20 liter Spray Units and 80' of poly air pressure hose with mounting clips. It uses 80 liters of our Odor Reactant Solution every other month at standard settings. The solution is available separately as a concentrate in 1 quart jugs to make 20 liters. There are 3 scents available: No Scent, Southern Breeze, and Orchard Air. This solution is recommended for our system. Other solutions used in this system will void the warranty.

This is a timer controlled, pressurized system that atomizes the solution at predetermined settings. The system is designed to be mounted on the wall of the trash room away from residential spaces as it does make some noise. System requires 120vac 60hz outlet. See attached spec's for this product before ordering.
